### Glossary of Terms

**Draft** - A diagram that represents a woven pattern. A full draft will depict the threading, tie-up, treadling sequence and a drawdown of the cloth.

**End** - A single warp thread.

**Filler** - Another term for weft.

**Finishing** – The way the cloth is processed when it is taken off the loom. It also refers to knotting or twisting of fringe hemming etc.

**Huipil** - The traditional Mayan blouse worn in Mexico.

**Pick** - A single pass (or shot) of weft thread.

**Plain Weave** - A simple weave structure. One weft passes over one warp end and under one warp end. The adjacent warp end and weft pick reverse the actions of the first.

**Ply** - When yarn is spun, it is twisted into a single strand. This is referred to as "singles" or "single ply" yarns. Two strands together are called a 2-ply yarn, 3 singles a 3-ply yarn, etc.

**Selvedge, Selvage, Selvege** - The vertical sides of the woven cloth. The edges of the fabric that do not unravel.

**Shed** - The opening between the upper and lower warp threads. The shuttle and weft threads pass through the shed.

**Shuttle** - The tool that holds the weft. Some types of shuttles include stick shuttles, boat shuttles and end feed shuttles.

**Tabby Plain weave** - Tabby is used for every other pick in structures like overshot, and summer and winter.

**Tapestry** - A piece of thick textile fabric with pictures or designs formed by weaving coloured weft threads or by embroidering on canvas, used as a wall hanging or soft furnishing.

**Warp** - Vertically aligned threads that attach to the front and back of the loom. A single warp thread is called an end.

**Warp Face** - The warp that is dominant in the woven cloth. The warp covers the weft.

**Yarn** - Spun thread used for knitting, weaving or sewing.
